STATEMENT OF INTENT BETWEEN THE DEPARTMENT OF DEFENSE AND INLAND EMPIRE WATER ENTITIES

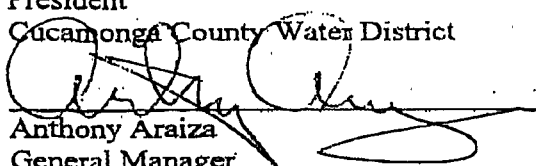

Objective:

To establish a collaborative process culminating in a Memorandum of Understanding combining the technical, financial, environmental, and legislative resources of the Department of Defense and the affected agencies and interests of the Inland Empire of Southern California whose groundwater resources have been impacted as a result of perchlorate contamination.

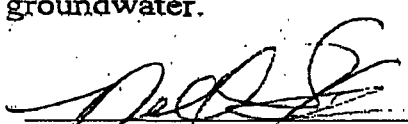

The intent of this collaborative process is to ensure timely participation toward matters related to the characterization of the perchlorate impacted areas, identification of clean-up measures needed and the implementation of clean-up solutions. This would include assistance with the demonstration of technologies and remedial programs and pursuing additional resources leading to the cleaning up of the local groundwater.

John Paul Woodley, Jr.
Assistant Under Secretary
United States Department of Defense
